PROFILE

Data Science student pursuing dual degrees in Computer Science and Data Science & Applications. Builds practical machine-learning, secure-coding, and AI systems using Python, scikit-learn, FastAPI, and modern data tools. Interested in data scientist and machine-learning opportunities where analytical thinking and product-focused engineering can create measurable impact.

EDUCATION

B.Sc. Computer Science — Expected 2027
Bharati Vidyapeeth Deemed University — Yashwantrao Mohite College

BS Data Science and Applications — Expected 2028
Indian Institute of Technology Madras

SELECTED PROJECTS

AgriIntel AI · Smart Agriculture Platform
Rebuilt an AI-powered agriculture platform from scratch for early crop-disease detection, designed to help farmers increase yield and reduce crop loss.

CityPulse · Google Hackathon Project
Combined weather, air-quality, and UV data into a unified **Go / Caution / Avoid** recommendation system for outdoor activities.

Attack Surface Sentinel · AI Security Agent
Built an autonomous agent to scan personal GitHub repositories for leaked secrets, exposed credentials, and security vulnerabilities.

BAH 2026 — Team Yugen · Bharatiya Antariksh Hackathon
Leading a team building an offline AI copilot for ISRO, focused on reliable assistance in environments with limited or no connectivity.

TECHNICAL SKILLS

Data Science & Machine Learning
Python · scikit-learn · Pandas · NumPy · Random Forest · Anomaly Detection · Data Analysis · Data Visualization · Matplotlib · Generative AI · Prompt Engineering

Cybersecurity & Secure Coding
Application Security · Secure Coding · Authentication & Authorization · JSON Web Tokens (JWT) · OWASP · Cryptography · bcrypt Password Hashing · Security Logging

Backend, Data & Deployment
FastAPI · REST APIs · MongoDB · NoSQL · Git · Pytest · Software Testing · Cloud Deployment

Frontend
React.js · JavaScript · HTML/CSS

LEADERSHIP & PROFESSIONAL STRENGTHS

Team Leadership · Problem Solving · Technical Writing
